

Approach Policy

Purpose: To establish standards for dealing with Approaches

- The development of any approach onto property within the municipality requires the prior approval of Council.
- A complete written request must be completed along with a site sketch and, upon approval, the approach shall be installed to municipal specifications and the installation shall be the responsibility of the landowner.
- During road construction, existing approaches may be altered or moved at the cost of the municipality, provided the landowner submits the request prior to the construction.
